Experience

Greenruhm — *Freelance Software Engineer*

8/2022 - PRESENT

Greenruhm is a community for musicians and superfans. Pair programming on smart contracts in Solidity and JavaScript using Test Driven Development.

Sushi Gallery — *Freelance Software Engineer*

2020 - 2022

Design, develop, optimize and maintain Sushi Gallery, a restaurant website. Collaborated with restaurant owners and with software engineers to improve website functionality. Connected Google Sheets with React front-end to make it easy for non-technical restaurant owners to make changes to the site.

Accurate or Nah — *Freelance Software Engineer*

2020

Accurate or Nah is a fun online multiplayer drawing game. Used Firebase to support real time features like multiplayer chat.

Education

DevAnywhere — *JavaScript/React Mastery*

08/2022 - PRESENT

1:1 JavaScript and React mentorship with Eric Elliott, author of 'Composing Software'.

General Assembly — *Software Engineering Immersive*

2019

Focused on HTML5, CSS3, the MERN stack, jQuery, and Python on full-stack web applications.

SKILLS

Software Engineer who loves to learn and is unafraid to take initiative in a team environment.

HTML5, CSS3, the MERN stack, jQuery, Figma, SQL, AWS, Express.js, Firebase, Node.js, MongoDB
